Our unwavering dedication to excellence
is reflected in everything we do

ABOUT US

Rush Right Limited is a trailblazing EPC company that recognises "It's Now O'clock" to drive social and economic growth in Nigeria through innovative solutions that transform communities and empower individuals.

Our unwavering dedication to excellence is reflected in everything we do, from providing cutting-edge construction, power, engineering, procurement, and marine services, to building enduring partnerships with clients in the public and private sectors. We understand that infrastructure development is a critical enabler of development, and we are proud to play our part in shaping a brighter future for Nigeria and by extension Africa.

Rush Right's expertise in executing wide range of infrastructure developments and solutions is unparalleled. We have the partnership as well as the wherewithal to demonstrate our accolades, but what truly sets us apart is our spirit of innovation and creativity. We are not content to simply follow the status quo; we embrace the challenge of breaking new ground and delivering tailored solutions that exceed the expectations of our clients.

At the heart of our approach is a commitment to sustainability. We believe that true progress is only possible when we prioritize the long-term health of our planet and communities. That's why we leverage the latest technology and global best practices, technical expertise, resources, and partnerships to deliver projects that meet the highest standards of quality, efficiency, and environmental responsibility. Our team of forward-thinkers at Rush Right comprise of local and international experts dedicated to ensuring that our clients receive the best possible service, no matter where they are located.

We are passionate about making a positive impact through our work, and we are committed to driving innovation and excellence in all our service areas. With our extensive portfolio and exceptional team, we are confident that we can exceed your expectations and deliver the best possible outcome for your project.

We invite you to join us in our mission to unlock infrastructure and service solutions to build a better future for all.

Vision

To be a household name in Africa renowned and trusted for its unwavering commitment to delivering top-tier infrastructure and service solutions.

Mission

To provide exceptional services and solutions that propel our clients to achieve unrivalled success and impact.

ABOUT US

We are proud to play our part in shaping a brighter future for Nigeria and by extension Africa.

CORE VALUES

Innovation

We are driven by the pursuit of innovation and constantly strive to challenge the status quo, pushing boundaries to create cutting-edge solutions that have a lasting impact on the world.

Excellence

Our unwavering commitment to excellence is reflected in everything we do. We hold ourselves to the highest standards of quality and continuously strive to deliver exceptional value to our clients and partners.

Sustainability

We are deeply committed to environmental responsibility and recognize the critical role we play in ensuring the long-term health of our planet and communities. We prioritize sustainability in all our projects and work tirelessly to create a better future for generations to come.

Collaboration

We believe that strong partnerships and collaborative teamwork are essential to achieving success. We work closely with our clients and stakeholders, fostering open communication and mutual trust to deliver outstanding outcomes.

Diversity & Inclusion

We celebrate diversity and inclusivity and believe that a diverse workforce is essential for driving innovation and achieving success. We strive to create a workplace culture that values and respects all individuals, regardless of their background or identity.

Integrity

Our unwavering commitment to integrity and ethical conduct are pivotal to everything we do. We are transparent, fair, and accountable, and hold ourselves to the highest ethical standards in all our dealings.

Agility

We are agile and adaptable, constantly evolving and responding quickly and effectively to changing needs and challenges. Our flexibility enables us to stay ahead of the curve and deliver exceptional results for our clients.

Responsiveness

We are deeply committed to understanding and responding to the needs of our clients, delivering personalized solutions that are tailored to their unique requirements. We are responsive and always available to provide the support and guidance our clients need to succeed.

Client-Focused

Our clients are at the centre of everything we do, and their satisfaction is our top priority. We are committed to delivering exceptional service and building long-lasting relationships that drive mutual success.

Impact

We are passionate about making a positive social impact through our work. We believe that our services have the power to transform communities and empower individuals, and we are dedicated to creating a better world through our actions and initiatives.

WHY WORK WITH US

Industry Knowledge

We have a deep understanding of the infrastructure and multiservice industry, enabling us to provide insightful advice and guidance to clients

Competitive Pricing

Rush Right Limited offers competitive pricing for its services, making it an attractive option for clients looking to get the most value for their money.

Diverse Portfolio

We offer a broad range of services. Thus, providing a one-stop-shop for clients looking for diverse solutions.

Expertise

Rush Right Limited has a team of highly skilled professionals with years of experience in their respective fields, ensuring that clients receive top-notch services.

Quality Control

Rush Right Limited maintains stringent quality control measures to ensure that all its services meet the highest standards of excellence.

Strategic Partnerships

We have established strategic partnerships with other leading players in the industry, creating opportunities for collaboration and mutual growth.

Safety

We place a high priority on safety, implementing robust safety protocols and training programs to ensure the safety of our employees and clients.

Customer-Centric

Rush Right Limited is committed to providing exceptional customer service by tailoring its services to meet the unique needs of each client and ensuring timely delivery.

Global Reach

We operate globally, providing services to clients in different parts of the world, thus positioning us as a leading player in the international infrastructure and multiservice industry.

CONSTRUCTION

CONSTRUCTION

As Nigeria's population continues to rapidly grow and urbanize, and modern infrastructure becomes increasingly necessary, the importance of a reliable and efficient construction industry cannot be overstated. Rush Right Limited is at the forefront of this critical sector, providing innovative and high-quality construction solutions to transform communities and empower individuals.

We understand that construction is not just about building structures, but also creating spaces that promote growth, development, and social cohesion. We believe that every construction project should have a positive impact on the environment, economy, and people. Therefore, we approach every construction project with a mindset of excellence, sustainability, and innovation.

Our construction services cover the following areas:

- General Contracting
- Pre-Construction
- Building Construction
- Design Build

General Contracting

Rush Right stands as the unparalleled choice for top-notch General Contracting services in Nigeria. Our team of highly skilled professionals leverages state-of-the-art technology and modern techniques to deliver exceptional results on every project, regardless of size or complexity. We are dedicated to safety, customer service, and support, providing personalized solutions to meet the unique needs of every client.

From commercial to residential and industrial construction, Rush Right's general contracting services cover a wide range of projects. Our team of specialists have managed projects of all sizes, from minor renovations to large-scale new constructions. We work closely with our clients to understand their vision and ensure that every project is completed to their satisfaction.

We offer a full suite of general contracting services, including pre-construction planning, project management, construction management, scheduling, budgeting, and quality control. We use modern equipment and software to ensure that every project is managed efficiently and effectively, from start to finish. Our expertise and knowledge enable us to manage every aspect of the construction process and deliver exceptional results.

66

We are at the forefront of this critical sector, providing innovative and high-quality construction solutions to transform communities and empower individuals.

General Contracting

For us at Rush Right, we fully understand the bidding process and can offer solid numbers based on years of experience and a clear understanding of the client's scope. Our commitment to exceeding our clients' expectations is evident in our attention to detail, adherence to deadlines, and refusal to compromise on quality.

What sets Rush Right apart from other general contracting companies is our unwavering commitment to safety. Safety is our top priority on every project, and we have a comprehensive safety program that ensures that everyone on the job site is protected. We also have a team of safety experts who oversee every project to ensure that all safety protocols are followed.

We take pride in our work and are committed to providing our clients with the best possible experience. Our team of experts is always available to answer questions, provide guidance, and offer support throughout the construction process. With Rush Right, clients can trust that their projects are in good hands, and that exceptional quality and service will be delivered every time.

66

Safety is our top priority on every project, and we have a comprehensive safety program that ensures that everyone on the job site is protected.

Pre-Construction

Preconstruction services are the cornerstone of any successful construction project. That's why we've assembled a team of experts with a wealth of experience in various aspects of the pre-construction stage. Our team has a comprehensive understanding of what it takes to bring a project to life, from working on the owner and developer side of the construction process to design, engineering, and construction roles.

We know that early involvement is crucial to the success of any project, which is why we work hard to gain a thorough understanding of your project goals and expectations. Our experts guide critical project decisions that can have a significant impact on the cost and schedule, ensuring that your project stays on track and within budget. Investing in preconstruction services adds substantial value at minimal additional cost.

Rush Right is committed to working collaboratively with your team or building a team of design and engineering professionals, along with subcontracting partners who take ownership of your project at an early stage to ensure its success. Our collaborative approach ensures that your project's design, schedule, and budget are optimized from the beginning, ultimately leading to a successful project delivery.

66

Our team has a comprehensive understanding of what it takes to bring a project to life, from working on the owner and developer side of the construction process to design, engineering, and construction roles.

Pre-Construction

We provide the following pre-construction services

PROJECT FEASIBILITY AND CONSTRUCTABILITY REVIEWS

Our team of experts will conduct a thorough analysis of your project to determine its feasibility and constructability. We will evaluate the site's conditions, examine the project's requirements, and provide recommendations to ensure that your project is feasible and constructible.

LIFECYCLE COST ANALYSIS

We conduct a lifecycle cost analysis to determine the total cost of ownership of your project. We will analyse the project's costs from design to construction to maintenance and provide recommendations to reduce the project's lifecycle costs.

VALUE ENGINEERING

We have the capacity to render value engineering analysis to identify opportunities to reduce costs while maintaining the project's design intent. We will evaluate alternative materials, systems, and construction methods to identify the most cost-effective solutions for your project.

SCHEDULE OPTIMIZATION

Our team develop comprehensive construction schedule that optimizes the project's delivery while minimizing delays and maximizing productivity.

SITE ANALYSIS - Our experts evaluate the site's conditions, including the soil conditions, geotechnical issues, and environmental factors, to ensure that the site is suitable for construction.

BUDGET AND COST DEVELOPMENT

We develop a comprehensive budget and cost estimate for your project, ensuring that your project stays on budget.

SUBCONTRACTOR REVIEW/SELECTION

Rush Right carry out a thorough review of potential subcontractors and select the best fit for your project. We will evaluate their experience, performance, and pricing to ensure that your project receives the highest quality work at the best possible price.

Design-Build

We are not just another design-build firm, but a team of passionate and committed individuals who are dedicated to delivering the best possible results for our clients. Our unwavering commitment to leadership, accountability, and building trusting relationships at every level has helped us become one of the most respected and successful firms in the region.

Our approach to design-build is built on the foundation of collaboration and partnership. We work closely with our clients, architects, and engineers as one unit, sharing a common goal of achieving the client's vision and mission for the project. Our reputation and expertise in the industry enable us to partner with innovative firms that share our values and our client's values, ensuring that we create a team that is perfectly suited to the needs of each project.

We take great care in selecting our partners, fully vetting them for their relevant experience and client-focused approach. Our teams are composed of the region's top architectural and engineering firms, each bringing their unique expertise and perspective to the project. Our streamlined and integrative approach creates efficiencies in the design and budget process, resulting in better solutions and better value.

66

Our reputation and expertise in the industry enable us to partner with innovative firms that share our values and our client's values, ensuring that we create a team that is perfectly suited to the needs of each project.

Design-Build

We take great care in selecting our partners, fully vetting them for their relevant experience and client-focused approach. Our teams are composed of the region's top architectural and engineering firms, each bringing their unique expertise and perspective to the project. Our streamlined and integrative approach creates efficiencies in the design and budget process, resulting in better solutions and better value.

For us, collaboration and leadership are not mere buzzwords but are the core principles that drive our success. We believe that an open and transparent approach, founded on collaboration, is essential in achieving optimal outcomes for our clients. By working as a united team, we make fully informed decisions with confidence, delivering exceptional results that surpass the expectation of our clients.

Our design-build services include the following

- Building Information Modelling (BIM) Coordination
- Design Alternative Analysis
- Design Team Coordination and Management
- Phasing & Constructability Reviews
- Preconstruction
- Program Analysis
- Sustainability
- System and Life-Cycle Analysis
- Virtual Design & Construction

Construction Management

Rush Right is driven by a relentless commitment to excellence in service and performance in the construction industry. We understand that delivering exceptional results requires a team of dedicated construction professionals and uniquely talented craftsmen working together towards one common goal- the success of each project. Our unwavering mission and vision are anchored on delivering the very best solutions and results for our clients, and leadership is central to our core values.

Our passion for building and executing projects from start to finish is evident in everything we do. We recognize that the construction process can be daunting, which is why we serve as client advocates throughout the entire journey. We understand that each project is unique and requires tailored solutions, and that is why we build client project teams based on their specific needs. This approach enables us to provide expertise across multiple disciplines and leverage our capabilities to achieve our client's goals.

From the outset of each project, we work closely with our clients to translate their vision into a detailed plan that will deliver optimal results. We then develop a comprehensive construction schedule and execute each stage of the process with precision and expertise to ensure that we meet our client's objectives.

As true builders, we take pride in providing innovative solutions that allow us to adapt to unpredictable construction situations and identify potential issues before they occur. Our focus on leadership means that we always serve as client advocates through transparent communication and seamless execution. The result is a streamlined process with exceptional results every time.

66

We are at the forefront of this critical sector, providing innovative and high-quality construction solutions to transform communities and empower individuals.

Construction Management

We remain committed to setting new standards of excellence in the construction industry. With our team of dedicated professionals, innovative solutions, and relentless pursuit of client satisfaction, we are confident in our ability to deliver unparalleled results for every project.

Construction management services include:

- Preconstruction
- Scheduling
- Cost Estimating
- Value Engineering
- Constructability Reviews
- Logistics Planning
- Bidding & Negotiation
- Bid Preparation
- Bid Award Recommendations
- Construction
- Contractor/Subcontractor Coordination
- Project Meetings
- Change Orders
- Quality Control
- Health & Safety Management
- Post-Construction
- Site Clean-Up
- Electronic Project Archive

PROCUREMENT

As businesses strive to remain competitive in today's fast-paced economy, procurement has become a key strategic function. Rush Right is proud to offer a comprehensive and unparalleled procurement service to businesses of all sizes. Our procurement service is designed to help our clients streamline their purchasing processes and achieve significant cost savings through strategic sourcing, vendor management, and contract negotiations. We pride ourselves on being a one-stop shop for all procurement needs, providing end-to-end solutions that are tailored to meet the unique requirements of each client.

Our team of procurement experts has years of experience working with businesses across various industries. We understand the challenges that businesses face when it comes to procurement, including managing suppliers, negotiating contracts, and ensuring compliance with regulations. We work closely with our clients to understand their procurement needs and develop customized solutions that are aligned with their goals and objectives.

We take a holistic approach to procurement. We believe that procurement is not just about buying products and services at the lowest possible price. It is about building long-term relationships with suppliers, optimizing processes, and driving innovation. Our procurement service is designed to help businesses achieve these objectives, while also delivering cost savings and operational efficiencies.

PROCUREMENT

Our procurement services are as follows:

STRATEGIC SOURCING

We work with our clients to identify the products and services they need and develop a sourcing strategy that aligns with their goals and objectives. Our strategic sourcing process includes supplier identification, qualification, and selection, as well as contract negotiation and management.

SUPPLIER MANAGEMENT

We help our clients manage their supplier relationships, ensuring that they are getting the best value for their money. We monitor supplier performance, track key metrics, and work with suppliers to drive continuous improvement.

SPEND ANALYSIS AND REPORTING

We provide our clients with comprehensive spend analysis and reporting, giving them visibility into their procurement spend and helping them make informed decisions about future purchases.

CONTRACT MANAGEMENT

We help our clients negotiate and manage contracts with suppliers, ensuring that they are getting the best possible terms and conditions. We also monitor contract compliance and manage any disputes that may arise.

PROCUREMENT PROCESS OPTIMISATION

We help our clients optimize their procurement processes, ensuring that they are efficient, effective, and compliant with regulations. We provide training and support to help our clients implement best practices and improve their procurement operations.

What sets us apart from our competitors is our commitment to delivering exceptional customer service. We take the time to understand the needs of our clients and develop customised solutions that meet those needs. Additionally, we also develop and maintain a strong local, regional and global supplier base – one that supports our clients' evolving needs. Crucial to this is our ability to evaluate existing and potential suppliers, their proposals and their quotations.

Whatever proposals and quotations are put in front of us, we consider the competitiveness of pricing, the quality of the goods and services and the overall supplier capabilities. We also consider factors which would contribute to the total cost of ownership of the goods or services.

POWER & RENEWABLE ENERGY

Rush Right is a globally recognized leader in the power and renewable energy solutions industry. We are deeply committed to helping businesses and organizations transition to clean and sustainable energy sources, and our multi-disciplinary team of specialists has a comprehensive understanding of the power industry. At Rush Right, we are dedicated to delivering innovative and cost-effective solutions that meet the unique needs of our clients throughout their asset's entire life cycle.

Our expertise extends to a wide range of power and renewable energy solutions, including solar, wind, geothermal, and hydropower. Our holistic approach to energy management goes beyond simply generating clean energy. We also prioritize energy efficiency, storage, and distribution, ensuring that our clients receive customized solutions that address their specific energy requirements and goals.

We are proud of our commitment to renewable energy and sustainability. We believe in leading by example, which is why we have implemented green practices throughout our operations. From using renewable energy sources to power our offices to reduce our carbon footprint through energy-efficient practices, we are dedicated to creating a sustainable future for all.

Our renewable energy engineering and consultancy services cover every stage of the process, including feasibility assessment, project design and development, construction and commissioning, and operation and maintenance. Our team provides a wide range of services, including wind and solar resource assessments, geotechnical studies, permitting studies, environmental and social impact assessments, vendor surveillance, and full wind and solar maintenance inspections.

POWER & RENEWABLE ENERGY

FEASIBILITY ASSESSMENT -

We conduct wind and solar resource assessments, geotechnical studies, preliminary feasibility assessments, and provide policy and regulatory guidance in HSE (SALEM). We also provide conceptual design services, including environmental, basic layout, grid connection point, basic project cost budgeting, and planning.

PROJECT DESIGN AND DEVELOPMENT -

Our services include permitting studies, conceptual design, environmental and social impact assessments, grid connection points, power quality, contractual support, purchase power agreement (PPA), and policy and regulatory guidance for HSE. We also provide basic and detailed engineering services, as well as Lender Independent Engineering.

CONSTRUCTION AND COMMISSIONING -

We provide vendor surveillance, owner engineering contract, quality assurance/quality control services, project management, mechanical, electrical, and civil construction supervision, commissioning support, and health & safety and environmental services.

OPERATION AND MAINTENANCE -

Our services include historical operation review, plant performance ratio assessment, full wind and solar maintenance inspection, predictive maintenance, technical due diligence, technical audits, and technical forensics.

What sets Rush Right apart from other organizations in the same service area is our dedication to providing comprehensive and customized solutions that meet our clients' unique energy needs. We understand that every business is different, which is why we work closely with our clients to develop tailored solutions that address their specific goals and requirements. With our deep industry knowledge and commitment to sustainability, we are confident that we can help our clients achieve their energy goals while making a positive impact on the environment.

Our power and renewable energy solutions are as follows:

- Transmission & Distribution
- Energy Storage
- Hydropower
- Solar Energy
- Wind Energy

Transmission & Distribution

The demand for sustainable energy is rapidly increasing, and as the energy mix shifts, the power grid must evolve to meet the demands of the present and the future. Rush Right's innovative and dependable grid solutions are designed to help our clients overcome the challenges of ageing infrastructure, integrate new energy sources into the grid, and build assets that are tailored to meet the needs of a constantly evolving energy landscape.

Our transmission and distribution projects are led by expert grid solutions teams who are committed to bringing reliability, stability, security, and automation to the modern-day power grid. We take into consideration socio-economic and environmental factors to ensure that our solutions are sustainable and successful in the long term. Our team has extensive experience in developing effective measures to protect local species, preserve forests, and minimize the impact of construction activities on landowner properties.

Our partnership with clients is essential to delivering cost-effective, sustainable, reliable, and customized solutions for high-voltage transmission infrastructure. We offer a full range of services, including grid planning, deployment of energy grid connectors and stabilizers, infrastructure deployments such as towers, cables, and pipelines, and energy planning and assessments.

At our core, we are driven to bring power wherever it is needed. Our vast experience includes designing and constructing overhead, underground, and subsea power lines over great distances and in challenging terrains, including dense forests, permafrost, mountains, swamplands, rivers, and oceans around the world. Our award-winning power delivery designs and project delivery methodologies have gained international recognition.

66

Our partnership with clients is essential to delivering cost-effective, sustainable, reliable, and customized solutions for high-voltage transmission infrastructure.

Transmission & Distribution

Our expertise spans across

- Grid Technologies
- Cybersecurity and Digitization
- Smart Grids and Automation
- Transmission Lines
- Substation Distribution
- High-Voltage Cables
- High-Voltage Direct Current (HVDC)
- Flexible Ac Transmission Systems (FACTS)
- Power System Planning
- Generation and Load Interconnections

With our proven track record and comprehensive range of services, we are committed to helping our clients achieve their sustainable energy goals and contribute to a brighter future for all.

ENERGY STORAGE

Energy storage is a fundamental pillar of our modern global energy system, and as we face the critical challenges of achieving energy security, supply across borders, and decarbonization, the need for safe and scalable storage infrastructure has never been more critical.

Our industry partners have decades of experience and deep knowledge in supporting the operation of existing and legacy energy storage infrastructure, as well as the development of new infrastructure. We draw on this expertise to help our clients monetize and maximize the value of their assets, from battery to liquid air, thermal, molten salt, pumped storage, and subsurface energy storage solutions.

Working in partnership with leading developers and operators of energy storage infrastructure, we are at the forefront of introducing new technologies to sustainable utility solutions. Our commitment to improving the reliability, resilience, and sustainability of our clients' energy systems for decades to come drives us to continuously innovate and adapt.

Our multi-disciplinary technical excellence, rigorous project management, and effective collaborative behaviour underpin our reputation as a leader in the energy storage sector, where we provide services to clients globally. Our in-house, specialist teams possess the skillset and experience to understand how to mitigate, minimize, and manage storage project and infrastructure risks.

66

Our commitment to improving the reliability, resilience, and sustainability of our clients' energy systems for decades to come drives us to continuously innovate and adapt.

TRANSMISSION & DISTRIBUTION

Our multi-disciplinary technical excellence, rigorous project management, and effective collaborative behaviour underpin our reputation as a leader in the energy storage sector, where we provide services to clients globally. Our in-house, specialist teams possess the skillset and experience to understand how to mitigate, minimize, and manage storage project and infrastructure risks.

We can support the full life cycle of energy storage or solar plus storage project, from initial development to construction and commissioning. Among the main services provided are:

Our multi-disciplinary technical excellence, rigorous project management, and effective collaborative behaviour underpin our reputation as a leader in the energy storage sector, where we provide services to clients globally. Our in-house, specialist teams possess the skillset and experience to understand how to mitigate, minimize, and manage storage project and infrastructure risks.

We can support the full life cycle of energy storage or solar plus storage project, from initial development to construction and commissioning. Among the main services provided are:

- Evaluate local market opportunities and limitations for energy storage.
- Evaluate and model energy storage revenue streams to optimize project sizing and cost.
- Bankability studies and Due Diligence reports evaluating the reliability of energy storage cells and energy storage integrators.
- Technical Due Diligence for acquisitions and review of the adequacy of the proposed design and controls system.
- Preliminary and Detailed Design of energy storage systems
- Request for Proposal (RFP) services for energy storage systems and energy storage EPCs to streamline the procurement process. The process would include the development of an RFP package including the schedule, the scope of work, and management of the bidding process.
- Factory and Site Acceptance Testing (FAT/SAT)
- Energy storage periodic monitoring and assessment. Capable of validating if energy storage provider is meeting their long-term service agreement requirements and guaranteed capacity.

We stand ready to provide our clients with the highest quality service and expertise in energy storage solutions. With our multi-disciplinary technical excellence, rigorous project management, and effective collaborative behaviours, we are committed to delivering sustainable and resilient energy systems that meet the needs of our clients today and for years to come.

Hydropower

Rush Right is committed to delivering high-quality hydropower services that prioritize sustainability and innovation. We pride ourselves on our ability to integrate cutting-edge technology with our extensive expertise, providing our clients with leading solutions that deliver optimal benefits.

Experience, innovation, and sustainability are at the core of Rush Right's hydropower services. As a leading provider of hydropower solutions, we bring a wealth of expertise and cutting-edge technology to create sustainable solutions that deliver optimal benefits for our clients.

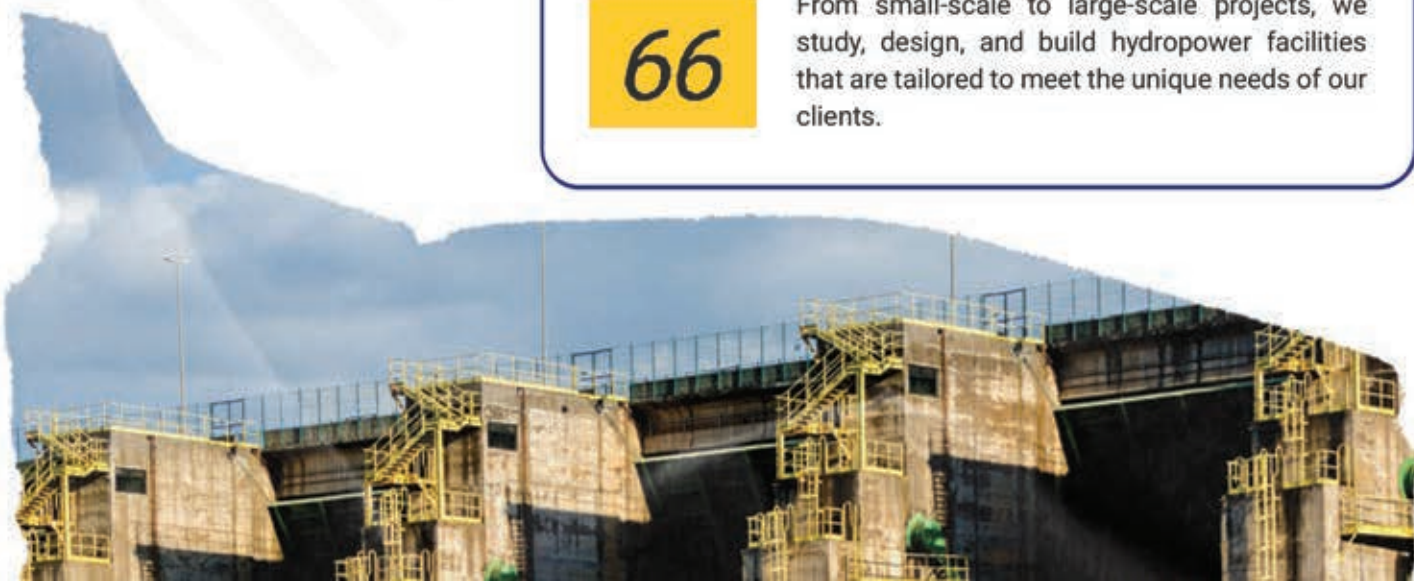

From small-scale to large-scale projects, we study, design, and build hydropower facilities that are tailored to meet the unique needs of our clients. Our comprehensive range of services includes everything from dam safety assessments to flood and water assessments, geotechnical assessments, environmental assessments, and detailed design and construction support for new hydro plants. We also offer condition assessment and rehabilitation solutions for ageing facilities, ensuring that our clients' existing infrastructure is upgraded to meet modern standards.

Our commitment to excellence is unwavering, and we test all our solutions using the latest 3D and 4D simulations to ensure they meet the highest standards. With over 60 hydroelectric developments rehabilitated and upgraded, and more than 120 dam safety assessments performed worldwide, we have a proven track record of delivering sustainable solutions that reduce pressure on the natural environment and increase project viability.

From small-scale to large-scale projects, we study, design, and build hydropower facilities that are tailored to meet the unique needs of our clients.

66

From small-scale to large-scale projects, we study, design, and build hydropower facilities that are tailored to meet the unique needs of our clients.

Hydropower

Integral to our approach is a recognition that the success of any hydropower project relies not only on engineering excellence but also on a deep understanding of local communities and environments. That's why we work closely with clients, regulating agencies, and local stakeholders to develop ideas that maximise the credentials of our clients' clean power projects.

Our Hydropower Service are as follow

- **Rehabilitation & Modernization of Ageing Hydro Facilities**
- **Dam Safety**
- **Hydro Plants**
- **Pumped Storage Hydropower**

Rehabilitation & Modernization of Ageing Hydro Facilities

We understand that ageing hydro facilities can present significant challenges for our clients, which is why we offer a comprehensive range of rehabilitation and modernization services to ensure the continued optimal performance and safety of your facility.

Our experienced team of experts conduct thorough on-site assessments of your facility's structural and equipment adequacy to provide detailed recommendations for repair, replacement, or modernization. We also provide transparent cost estimates and execution schedules, ensuring that your project is executed efficiently and within budget.

Our extensive range of services includes:

- Energy generation studies to optimize your facility's output and efficiency
- Rigorous inspections, geological investigations, and seismic studies to identify any underlying issues that require attention
- Assessment of structural adequacy and hydraulic conditions at existing structures to ensure their safety and integrity
- Monitoring and instrumentation programs to provide real-time data and insights into your facility's performance

- Materials testing and quality evaluation to ensure the highest standards of quality and reliability
- Dam safety analysis and alkali-aggregate reactivity assessment to identify and mitigate any potential hazards
- Evaluation of electrical and mechanical equipment and refurbishment to ensure optimal performance and reliability
- Review of power upgrading potential and redevelopment to maximize your facility's potential
- Design and construction management of rehabilitation works to ensure seamless execution and minimal disruption to your operations

Our hydro-technical services also include basin studies and inventories of hydraulic resources, hydrological studies such as flood frequency and probable maximum flood assessment, hydraulic studies, 1D, 2D, and 3D numerical modelling, dam break studies and inundation mapping, risk assessment and hazard classification, emergency measure plans, and energy assessment and cost benefits.

Partnering with us means having access to a team of experts with an unparalleled commitment to quality and safety, ensuring that your facility is operating at its optimal capacity while minimizing any potential risks.

Dam Safety

Ensuring the safety of a dam is paramount to safeguarding the well-being of our communities and environment. That's why we employ cutting-edge modelling tools and provide a comprehensive range of services to assess the safety of dams and water retaining structures, ensuring they meet the highest standards and regulatory requirements.

Our wide-ranging services include:

- Conducting meticulous on-site inspections
- Implementing state-of-the-art monitoring and instrumentation programs
- Performing thorough geological explorations, planning and supervision of drillings
- Conducting rigorous materials testing and quality evaluations
- Assessing alkali-aggregate reactivity
- Conducting seismic studies
- Undertaking stability analyses
- Evaluating structural adequacy
- Conducting hydrological studies such as flood frequency and probable maximum flood assessment
- Assessing hydraulic studies and spillway adequacy
- Conducting dam break analyses and inundation mapping

- Undertaking risk assessment and hazard classification
- Reviewing reservoir management
- Developing emergency preparedness plans
- Conducting thorough environmental impact studies.

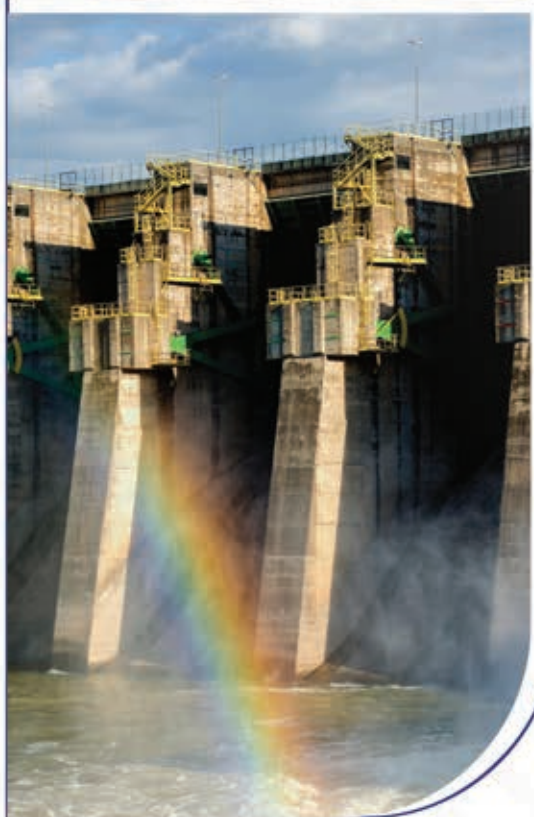

With our comprehensive approach to dam safety, we ensure that our clients have all the necessary information to make informed decisions regarding their structures. Trust us to deliver the expertise and guidance you need to keep your dam safe and secure.

66

Ensuring the safety of a dam is paramount to safeguarding the well-being of our communities and environment.

Hydro Plants

We take pride in our unmatched ability to seamlessly integrate proven hydropower techniques with cutting-edge industry innovations, enabling us to deliver tailored solutions that meet the distinctive site requirements and environmental restrictions of our clients.

Our team of experts provide comprehensive services that cover every aspect of your hydropower project, including design, project management, procurement, construction, and operations & maintenance, ensuring that your project is executed flawlessly from start to finish.

Our extensive range of services includes:

- Complete engineering, procurement, and construction support for new-build projects
- Rehabilitation and modernization of existing facilities to ensure optimal performance
- Conducting meticulous due diligence studies and analysis to minimize risks and ensure maximum returns on your investment.

Our unrivalled experience includes delivering successful projects for reservoir, run-of-the-river, and pumped storage facilities.

Partnering with us means having access to world-class expertise that is fully committed to delivering innovative, sustainable, and cost-effective solutions to meet your hydropower needs. With our unwavering dedication to quality and safety, we guarantee that your project will be in good hands, delivering exceptional results that exceed your expectations.

66

Our unrivalled experience includes delivering successful projects for reservoir, run-of-the-river, and pumped storage facilities.

Pumped Storage Hydropower

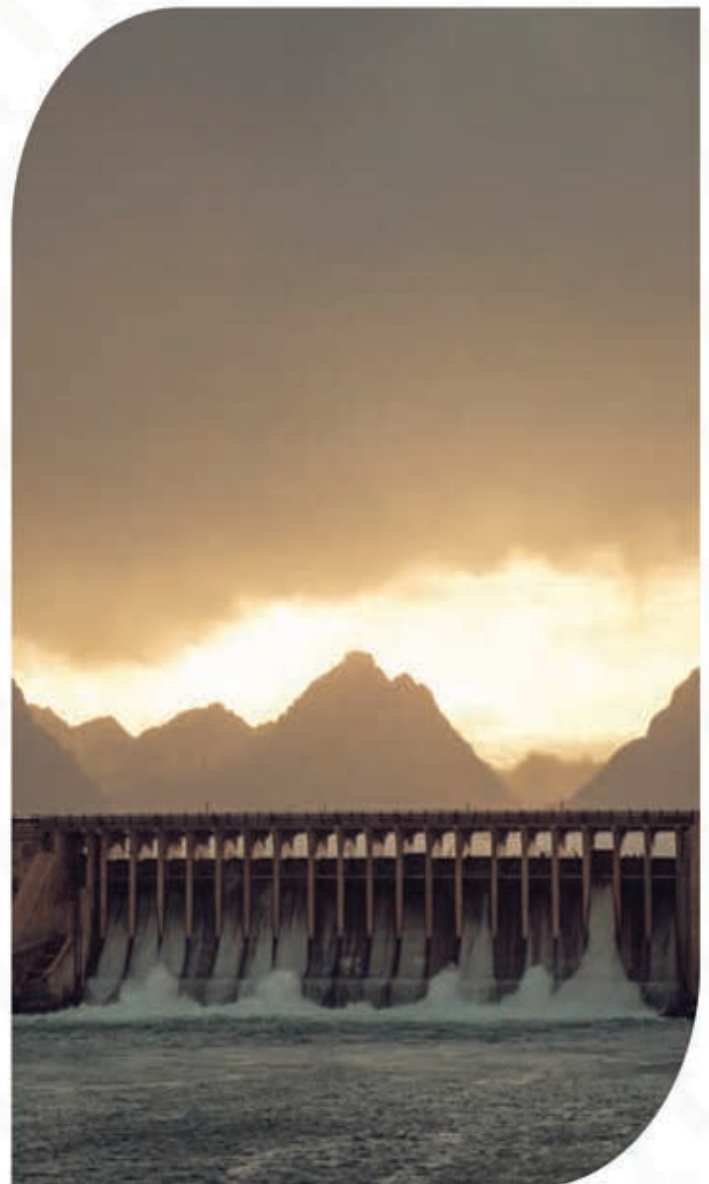

As a leading expert in the field of hydropower development, we possess the specialized knowledge, industry connections, and global reach necessary to deliver state-of-the-art pumped storage solutions that meet the highest standards of quality and efficiency.

Our extensive experience in small-to-large-scale hydropower developments enables us to provide a range of variable-speed pumped storage options, including:

- Designing for a wider head range that is achievable with variable speed pump turbines, optimizing your project's performance
- Calculating the ideal powerhouse sizing to accommodate all the extra equipment required for your project
- Leveraging our electrical expertise to ensure the successful study, design, installation, and commissioning of specialized equipment.

Our close collaboration with industry-leading manufacturers provides us with unparalleled insight into equipment requirements, resulting in highly accurate cost estimation and delivery schedules.

We pride ourselves on delivering best-in-class pumped storage solutions that are specifically tailored to meet the unique needs of our clients. With our unwavering commitment to excellence, we guarantee that your project will be executed seamlessly, delivering exceptional results that surpass your expectations.

**66**

Ensuring the safety of a dam is paramount to safeguarding the well-being of our communities and environment.

Solar Energy

Solar energy is the future, and Rush Right is proud to be a leading provider of exceptional renewable energy services. We offer exceptional renewable energy services to our valued customers, including a comprehensive range of solar services that sets us apart from other organizations in the industry.

Our wide range of solar services includes solar design engineering, solar consulting, QA/QC on solar panels and other PV plant components, or solar testing and inspection. They are designed to provide high-quality, reliable, and cost-effective solutions that help our clients save money on their energy bills while reducing their carbon footprint.

Our team of experts has years of experience designing, installing, and maintaining solar energy systems of all sizes and types. We have a deep understanding of the latest technologies and trends in the industry, and we use this knowledge to provide customized solutions that meet the unique needs of each customer. Our solar experts work closely with customers to evaluate their energy needs, assess their site conditions, and recommend the best solar system that meets their goals.

66

Our wide range of solar services includes solar design engineering, solar consulting, QA/QC on solar panels and other PV plant components, or solar testing and inspection.

Solar Energy

Our solar services cut across:

- Solar Panel Installation
- Solar Battery Storage
- Solar Monitoring & Maintenance
- Solar Financing

Rush Right is committed to providing its clients with the highest quality solar services. Our team of experts has the knowledge, skills, and expertise to design, install, and maintain solar energy systems that meet your unique needs and goals.

Wind Energy

Rush Right is an industry leader in Renewable Energy, offering a full range of Wind Services to clients who seek sustainable and cost-effective energy solutions.

Our Wind Service Area is comprehensive, encompassing everything from site assessment to post-installation maintenance. It comprises technical expertise and independent advice in wind engineering, wind consulting, QA/QC, and wind turbine inspection, among others, for utility-scale projects. We take pride in delivering cutting-edge solutions that are both environmentally friendly and efficient, helping our clients' transition to a more sustainable future.

Our wind consultants and experts provide high-value-added onshore and offshore wind services such as specialized technical consulting, engineering, wind inspection, and quality assurance on the manufacturing process for the main components of the wind turbines, as they aim to ensure maximum profitability and adequate risk management to their clients.

66

We take pride in delivering cutting-edge solutions that are both environmentally friendly and efficient, helping our clients' transition to a more sustainable future.

Wind Energy

Our Wind Service expertise is divided into the following categories:

SITE ASSESSMENT AND DESIGN

Our team of engineers and consultants conducts a thorough site assessment to identify the most suitable wind turbine for your location. We analyze the wind patterns, topography, and other factors to determine the optimal placement and design of your wind turbines. We take into account any local zoning and environmental regulations to ensure that your installation complies with all relevant laws and regulations.

WIND TURBINE PROCUREMENT AND INSTALLATION

We procure top-quality wind turbines from trusted manufacturers and oversee the entire installation process from start to finish. Our experienced installers ensure that every component is properly installed and commissioned for maximum efficiency and longevity. We use state-of-the-art tools and techniques to ensure that your wind turbines are installed to the highest standards of safety and quality.

OPERATIONS AND MAINTENANCE

Rush Right offers a comprehensive range of maintenance and repair services to ensure that your wind turbines are running at optimal performance. Our team of experts performs regular inspections to identify and address potential issues before they become serious problems. We provide real-time monitoring to help you optimize your wind turbine performance and reduce maintenance costs.

ENERGY STORAGE SOLUTIONS

We provide a range of energy storage solutions that allow you to store excess energy generated by your wind turbines. These solutions help you reduce your energy costs by allowing you to use stored energy during times when wind generation is low. We work with you to design a customized energy storage solution that meets your specific needs and budget.

Wind Energy

We are dedicated to providing our clients with reliable, sustainable, and cost-effective wind solutions. Our team of experts works closely with you to understand your unique requirements and design solutions that are tailored to your specific needs. We take pride in offering comprehensive solutions that are environmentally friendly and efficient, helping you reduce your carbon footprint while also saving you money on energy costs.

In addition to our core Wind Services, we also offer a range of additional services, including:

FEASIBILITY STUDIES

We conduct feasibility studies to help you determine the viability of wind energy for your business. Our experts analyse your energy usage and site location to determine whether wind energy is a feasible option for your needs.

PROJECT FINANCING

We offer project financing to help you fund your wind energy project. We work with a range of financing partners to help you secure the funding you need to get your project off the ground.

ENVIRONMENTAL COMPLIANCE

We help you navigate the complex regulatory landscape surrounding wind energy. We ensure that your project complies with all relevant environmental regulations, including air quality,

ENGINEERING

Rush Right is a force to be reckoned with in the industrial engineering field. With a team of multi-disciplined engineers boasting years of experience, we have the skills and expertise necessary to tackle even the most complex and challenging manufacturing and industrial problems.

Our engineering services are a cut above the rest, boasting the latest state-of-the-art technology and the most innovative solutions to even the most complex industrial challenges. From paint and process coatings strategies to electrical engineering solutions, structural engineering services, systems engineering, conveyance system solutions, equipment and tooling, and facility layout and design, we strive to add value at every stage of a project by bringing together passionate, dedicated people who challenge, explore, and expand traditional thinking through a hands-on approach.

As leaders in the industrial engineering industry, we set the bar for excellence, inspiring others to follow in our footsteps. Our dedication to incorporating lean principles into our clients' operations sets us apart from the competition and ensures that we always deliver maximum efficiency and value.

ENGINEERING

Rush Right is your go-to source for a wide range of top-tier electrical engineering services, from power distribution to living system design to systems integration. We understand that each project is unique, which is why we customize our services to meet your specific requirements.

Our engineering services are as follows:

- Civil Engineering
- Electrical Engineering
- Mechanical Engineering
- Structural Engineering

Civil Engineering

Rush Right's central objective is to provide an all-inclusive array of civil site design and permit services to our diverse clientele, ranging from individuals to companies and public agencies alike. Our distinguished team of civil and structural engineers have honed their skills to offer unparalleled services tailored to meet the unique goals and obstacles of each project.

We are convinced that collaboration is the linchpin of success. Our adept team works closely with every client to craft bespoke projects that cater to their specific requirements while accommodating site limitations, environmental concerns, and budget constraints. Our team consists of accomplished civil engineers, landscape architects, environmental scientists, and low-impact development specialists. We pride ourselves on being at the vanguard of site design processes, leveraging innovative approaches to diminish our ecological footprint.

We comprehend that civil development calls for a sensitive equilibrium between satisfying the demands of community leaders and the public, while also considering financial constraints. This is why we provide a comprehensive range of structural consultation services to architects, developers, contractors, private clients, local authorities, and governmental entities.

Our team is committed to creating human-centric designs that foster and strengthen communities, forging robust bonds with the inhabitants we serve.

Our unwavering commitment to delivering exceptional services that transcend our clients' expectations has fostered our reputation for excellence, grounded on our unwavering dedication to quality, innovation, and collaboration.

66

We pride ourselves on being at the vanguard of site design processes, leveraging innovative approaches to diminish our ecological footprint.

Civil Engineering

Our construction system encompasses wet construction, dry construction, and steel works. We specialize in constructing various edifices such as roads, bridges, drainage systems, utilities, heavy industry constructions, and all structural elements such as foundations, basements, floor slabs, columns, beams, and roofs, to mention a few.

We believe that construction should serve as a stimulus for economic expansion and job creation, which is why we prioritize local content and skills development. We work in close partnership with local communities, providing training and employment opportunities for locals. Our construction projects have generated numerous job opportunities for Nigerians, endowing them with the expertise and knowledge to build successful careers in the construction industry.

Rush Right Limited's construction services go beyond erecting structures; we create spaces that foster growth, development, and social harmony. Our commitment to delivering innovative, sustainable, and high-quality construction solutions transforms communities and empowers individuals.

66

Our commitment to delivering innovative, sustainable, and high-quality construction solutions transforms communities and empowers individuals.

ELECTRICAL ENGINEERING

Our Electrical Engineering services cover a wide range of areas, from design and installation to maintenance and repair. We cater to both commercial and residential clients, and our solutions are tailored to meet the specific needs of each customer. We understand that every project is unique, and we work closely with our clients to ensure that we deliver solutions that meet their expectations.

Our team of engineers have expertise in the following areas:

- Electrical Design & Installation
- Electrical Maintenance
- Power Distribution & Load Planning
- Lighting Systems
- Ventilation
- Networking

66

Our commitment to delivering innovative, sustainable, and high-quality construction solutions transforms communities and empowers individuals.

Electrical Design & Installation

ELECTRICAL DESIGN AND INSTALLATION

We offer full-service electrical design and installation solutions for residential, commercial and industrial buildings. Our engineers work closely with our clients to design and install safe, efficient and reliable electrical systems that meet their specific needs.

ELECTRICAL MAINTENANCE

We provide preventive and corrective electrical maintenance services to ensure that our clients' electrical systems remain in good working order. Our team of skilled technicians conducts routine inspections and repairs as necessary to prevent downtime and minimize the risk of electrical hazards.

POWER DISTRIBUTION & LOAD PLANNING

Rush Right understands the critical importance of power distribution and load planning. Without proper planning, high demand can easily overwhelm the electrical grid, leading to blackouts and disconnections. Our experienced specialists will help you maintain balance, reduce costs, and minimize emissions.

LIGHTING SYSTEMS

The right lighting system is essential for safety and visibility in any facility. As a full-service electrical engineering consulting firm, Rush Right can design a custom lighting system tailored to your unique needs. All our systems are energy-efficient and optimized to maximize your productivity. Contact us today to

VENTILATION

When it comes to ventilation, airflow design and pressure management are essential considerations. Our engineering team have the capacity to help you plan and implement a ventilation system that meets your specific needs while ensuring the safety of your employees.

NETWORKING

Rush Right is your trusted partner for designing and implementing safe and practical electrical networks from the ground up. Whether you need a simple nonlinear network or a more complex system, our experienced engineers will create a customized solution that meets your specific requirements.

Mechanical Engineering

We pride ourselves on providing exceptional mechanical engineering consulting and services that consistently deliver tangible results. What sets us apart from other mechanical engineering companies is our unwavering commitment to delivering objective evaluations and customized solutions that are tailored to meet the specific needs of each of our clients.

We recognize that the success of your business hinges on cost-efficient and effective mechanical systems, which is why we make cost-efficiency a cornerstone of our mechanical engineering services strategy. With extensive multinational experience across the globe, we possess a deep understanding of the complexities involved in ensuring optimal profitability while minimizing additional costs.

Our comprehensive suite of mechanical engineering services is designed to help our clients succeed in achieving their goals. From calculating plant space availability to estimating equipment and parts longevity, we provide reliable cost estimates and ensure that your test specifications are in line with project blueprints. We can test individual parts and tools, draft blueprints, and guide you from project inception to successful completion.

**66**

We pride ourselves on being at the vanguard of site design processes, leveraging innovative approaches to diminish our ecological footprint.

Mechanical Engineering

Rush Right offers a comprehensive suite of mechanical engineering services that cater to the unique requirements of our clients. Some of our areas of expertise include:

MECHANICAL DESIGN - Our team of experts utilizes cutting-edge software and techniques to design mechanical systems that cater to the specific needs of our clients.

PRODUCT DEVELOPMENT - We specialize in developing innovative products that meet the needs of our clients while also adhering to regulatory requirements.

MANUFACTURING ENGINEERING - We have extensive experience in developing and optimizing manufacturing processes to improve efficiency and reduce costs.

STRUCTURAL ANALYSIS - Our team of experts can perform complex structural analyses to ensure that your mechanical systems are safe, reliable, and meet the requirements.

FINITE ELEMENT ANALYSIS (FEA) - We use FEA to simulate the behaviour of mechanical systems under various conditions to identify potential issues and optimize their performance.

COMPUTATIONAL FLUID DYNAMICS (CFD) - Our experts use CFD to simulate fluid flow and heat transfer to optimize the performance of mechanical systems.

3D MODELING AND SIMULATION - Our team uses state-of-the-art 3D modelling and simulation software to develop and test mechanical systems before they are built.

PROJECT MANAGEMENT - We offer project management services to ensure that your project is completed on time, within budget, and to your satisfaction.

We adopt a proactive approach to refining your designs and sketches, suggesting improvements based on our in-depth analysis. Our primary focus is always on the necessary improvements that will help your enterprise thrive. We utilize state-of-the-art computer-based simulations and practical experimentation to analyse test results and provide tailored recommendations that cater to your distinct needs.

If you are searching for a mechanical engineering enterprise that provides personalized solutions that cater to the specific needs of your enterprise, look no further than Rush Right. Trust us to empower you to increase profitability, decrease expenses, and achieve the success that you deserve.

Structural Engineering

We constantly push the boundaries to meet the high expectations of our clients. Our expertise allows architects to realize their aesthetic visions, while our clients meet their commercial and operational goals. We have a long history of innovation, as well as a reputation for imaginative thinking coupled with common sense solutions. The buildings we engineer perform well throughout their lifetime and make a positive contribution to society and the environment.

We constantly push the boundaries to meet the high expectations of our clients. Our structural engineers are committed to creating buildings, that represent the best combination of creativity and economy. We listen, we design, and we work proactively with your professional team to develop a tailored design strategy that suits the project's aspirations.

Our team of highly skilled and experienced structural engineers has a wealth of expertise in designing and analysing structures of all types and sizes, including buildings, bridges, towers, and other infrastructure. We employ advanced tools and techniques to evaluate and optimise structural systems for maximum performance, efficiency, and safety.

Our services cover all aspects of structural engineering, from initial concept design and feasibility studies to detailed engineering analysis and construction supervision. Our engineers work closely with architects, contractors, and other stakeholders to ensure that the structural design is fully integrated into the overall project and that all relevant codes and standards are met.

One of the key areas of expertise that sets Rush Right apart from other structural engineering firms is our experience in designing complex and challenging structures. Our team has designed structures that span wide rivers, withstand extreme weather conditions, and support heavy loads in harsh environments. We pride ourselves on our ability to take on challenging projects and deliver innovative solutions that exceed our client's expectations.

AGRO-ALLIED

Agriculture has always been the backbone of Nigeria's economy, and as the demand for food and agricultural products continues to increase, there is a growing need for high-quality agro-allied services that can help farmers and agribusinesses achieve their goals. At Rush Right, we are committed to providing our clients with the best agro-allied services in Nigeria, using state-of-the-art technology and the latest scientific knowledge to help them achieve maximum productivity and profitability.

Our agro-allied services are based on a deep understanding of the Nigerian agricultural landscape, as well as the specific needs and challenges facing farmers and agribusinesses. We offer top-notch services to farmers and agro-allied industries.

Our team of experts comprises seasoned professionals with years of experience in the field. We offer a wide range of services, including agricultural consultancy, farm management, agricultural equipment, agricultural inputs, and agricultural training. Our services stand out from other organizations in Nigeria due to our high level of professionalism, quality assurance, customer satisfaction, and competitive pricing.

Our Agro Allied service covers a wide range of areas, including:

- Agricultural Consultancy
- Farm Management
- Livestock Production
- Marketing & Distribution
- Agricultural Training

AGRO-ALLIED

AGRICULTURAL CONSULTANCY - Our agronomy experts work closely with our clients to provide professional advice and guidance to farmers and agro-allied industries on best practices in crop and livestock farming. We leverage the latest research and technology to help farmers achieve their production goals while minimizing costs and reducing environmental impact. Our consultancy services include soil testing, crop selection, fertilizer application, and pest and disease control. Our experts also provide guidance on livestock management, including breeding, nutrition, and animal health.

FARM MANAGEMENT - Our farm management team provides comprehensive support to farmers, helping them to optimize every aspect of their operations. From crop planning and irrigation management to pest control and harvesting, we work closely with our clients to streamline their processes and maximize their profitability. Our services also include financial management, marketing strategies, and land management. With our support, farmers can focus on what they do best, which is producing high-quality crops and livestock.

LIVESTOCK PRODUCTION - Our team of livestock experts is dedicated to helping farmers improve their animal husbandry practices, with a focus on animal health, nutrition, and welfare. We provide customized advice on everything from breed selection and herd management to feed formulation and vaccination programs. Our services cover a wide range of livestock, including poultry, cattle, sheep, and pigs. With our support, farmers can improve the quality and quantity of their livestock production while minimizing production costs and reducing environmental impact.

MARKETING AND DISTRIBUTION - Rush Right understands that marketing and distribution are key to the success of any agricultural business. That's why we offer a range of services to help our clients get their products to market, including market analysis, branding and packaging, and logistics support. Our marketing experts work closely with our clients to identify new market opportunities, develop marketing strategies, and build their brand identity. Our logistics team ensures that the products of our clients are delivered on time and in good condition, both locally and internationally.

AGRICULTURAL TRAINING - Our team of specialists is passionate about sharing their knowledge and expertise with farmers and agricultural professionals across Nigeria to enhance their knowledge and skills in modern agricultural practices. We offer a range of training programs on topics such as crop cultivation and management, animal husbandry, and business development, all designed to help our clients succeed. Our training programs

TECHNOLOGY

Technology has revolutionized the way businesses operate, and it plays a critical role in enhancing productivity and efficiency in today's business landscape. At Rush Right, we understand the unique technology needs of Nigerian businesses, and we provide a range of technology services that are tailored to meet those needs. Our team of experts has years of experience in providing top-notch technology solutions that help businesses achieve their goals by leveraging the power of technology.

- **Network Design & Implementation**
- **Cybersecurity Services**
- **Cloud Computing Services**
- **Managed IT Services**
- **IT Consulting Services**

- **Website Design & Development**

TECHNOLOGY

NETWORK DESIGN AND IMPLEMENTATION

A robust, reliable, and scalable network infrastructure is essential for businesses to stay connected and operate smoothly. At Rush Right, we specialize in designing and implementing network infrastructures that meet the unique needs of our clients. Our team of experts will work with you to understand your requirements and design a network that is tailored to your specific needs. We also provide ongoing support and maintenance to ensure that your network is always up and running.

CYBERSECURITY SERVICES - With the increasing prevalence of cyber threats, it is essential to have robust cybersecurity measures in place to protect your business. At Rush Right, we offer a range of cybersecurity services that include threat assessments, vulnerability scanning, penetration testing, and security awareness training. Our goal is to help businesses stay secure and protected against cyber threats.

CLOUD COMPUTING SERVICES - Cloud computing has revolutionized the way businesses operate, enabling them to scale their operations quickly and efficiently. At Rush Right, we offer a range of cloud computing services that include cloud migration, cloud infrastructure design, and cloud security. Our team of experts will help you leverage the power of cloud computing to enhance your business operations.

MANAGED IT SERVICES - As businesses grow, managing IT infrastructure can become a challenging task. At Rush Right, we provide comprehensive managed IT services that include network monitoring, server management, and helpdesk support. Our managed IT services are designed to ensure that your business operations run smoothly, with minimal downtime and maximum efficiency. We also offer proactive maintenance and support to prevent issues before they occur.

TECHNOLOGY

IT CONSULTING SERVICES - Every business has unique technology needs, and we understand that at Rush Right. That's why we offer IT consulting services that are tailored to the specific needs of your business. Our team of experts will work with you to understand your business goals and objectives and provide customized technology solutions that help you achieve those goals.

DATA RECOVERY SERVICES - Data is the lifeblood of modern businesses, and the loss of critical data can have severe consequences. At Rush Right, we offer data recovery services to help businesses recover lost data due to hardware failures, natural disasters, cyber-attacks, and human errors. Our team of experts uses advanced techniques and tools to recover data from various storage devices.

IT INFRASTRUCTURE MANAGEMENT SERVICES - Managing IT infrastructure is a complex task that requires specialized skills and expertise. At Rush Right, we provide IT infrastructure management services that cover everything from network design and implementation to server management and cloud computing. Our team of experts will manage your IT infrastructure, ensuring that it is always up to date and running smoothly.

VOIP SOLUTIONS - Communication is critical for the success of any business, and VoIP (Voice over Internet Protocol) has revolutionized the way businesses communicate. At Rush Right, we offer VoIP solutions that enable businesses to make and receive calls over the internet, reducing communication costs significantly. Our team of experts will help you choose the right VoIP solution for your business and provide ongoing support and maintenance.

WEBSITE DESIGN AND DEVELOPMENT - A website is a critical component of any business's online presence, and it plays a crucial role in attracting and retaining customers. At Rush Right, we provide website design and development services that are tailored to meet the unique needs of your business. Our team of experts will work with you to design a website that reflects your brand and helps you achieve your business goals.

HEALTH, SAFETY & ENVIRONMENT (HSE) POLICY

Health, Safety, and Environmental (HSE) protection are crucial for the growth of an organisation and its people. As a leading organisation in Nigeria, we recognise the significance of HSE in achieving sustainable growth and are committed to providing a safe and healthy workplace for all employees, ad-hoc workers, vendors, and other relevant stakeholders, while also taking adequate measures to protect the environment and prevent pollution.

We understand that high standards of HSE are essential to achieve and sustain excellence in our businesses. Therefore, our senior management, in collaboration with all employees, is dedicated to continuously improving our HSE management system by adopting preventive measures, promoting awareness, and striving to achieve a zero-accident rate, among other measures.

To achieve our goals, we have incorporated HSE considerations into our business decisions and operations, provided information and training to employees and stakeholders, maintained proper equipment, and created effective planning and monitoring systems. We also strive to reduce our environmental impact by optimizing waste generation, preserving natural resources, and encouraging conservation and recycling.

All our employees have a responsibility to comply with this policy and support its implementation by adhering to safety rules, using the safety equipment issued to them, familiarizing themselves with the safety rules/procedures of the organization, and enforcing appropriate corrective measures if violations are reported at job sites.

Communication, consultation, participation, and collaboration among all employees and stakeholders will uphold the principles of this policy. We will implement this HSE Policy in accordance with applicable statutory requirements, safety and health regulations, and standards/codes of practice of our customers. We review this policy every two years and display it prominently on our office premises. Access to the detailed HSE manual will also be available for reference by any employee.

Our commitment to HSE reflects our values and dedication to the welfare of our employees, customers, and the environment. We are proud to set high standards of HSE in our industry, and we encourage other organizations to adopt similar policies and practices for a safer and

CORPORATE SOCIAL RESPONSIBILITY

Corporate Social Responsibility (CSR) is a vital aspect of Rush Right's operations. We are not just a profit-driven organisation; we are committed to improving the lives of individuals and making a positive impact on the communities where we operate. Our CSR initiatives are guided by our core values of excellence, compassion, and social impact. We believe that businesses should not only focus on generating profits but also contribute to the greater good of society.

HEE - Health, Education, Environment, and Entrepreneurship - are the four cardinal points that guide our CSR efforts. We recognise that these areas are critical in driving social change and promoting sustainable development. We are committed to creating, supporting, and nurturing initiatives that will make a meaningful impact in these areas.

One of our top priorities is health. We understand that access to quality healthcare is a fundamental right, and we are committed to providing healthcare support to indigent families and communities where we operate. Our initiatives include providing medical supplies to local health centres, offering affordable healthcare services, access to clean water, improved livelihood support, and provision of food supplies. We collaborate with national and international organisations to provide quality healthcare and improve the health and well-being of people across the African continent.

Education is another crucial area for us. We recognise that education is a key driver of social change, and we are committed to providing quality education for children in our host communities. Our educational activities focus on renovating and reconstructing dilapidated structures in public schools, awarding scholarships to indigent students, providing water facilities, career summits, and donating books and writing materials to NGOs. We believe that by doing so, we can mould children into successful individuals and impact the world positively.

Entrepreneurship is at the core of Rush Right's founding philosophy. We believe that empowering individuals and communities with the right skills and resources is the key to promoting economic development. Our CSR initiatives aim to empower youths and women with basic skills in different fields to provide solutions that meet various needs. This helps establish more SMEs and MSMEs within and outside the communities where we operate, further expanding the economic development of Africa.

We are proud of our commitment to Corporate Social Responsibility at Rush Right. We believe that through our initiatives, we are making a positive impact in our society and touching lives every day. We encourage everyone to join us on this journey, and together, we can make a difference.

LOCAL CONTENT POLICY

As a Nigerian company, Rush Right Limited understands the significance of promoting local content in all its business activities. In accordance with the Nigerian government's local content development policy, Rush Right Limited has created this Local Content Policy to comply with the Nigerian Oil and Gas Industry Content Development Act (NOGICD Act) of 2010 and other relevant local content laws and regulations. This policy applies to all our operations and activities.

POLICY STATEMENT

Rush Right Limited is committed to promoting local content in all its business activities. Our policy is to prioritize Nigerian companies, goods, and services in our procurement and contracting processes. We will collaborate with local suppliers, contractors, and service providers to enhance their capacity to meet our requirements, promoting local economic development and creating employment opportunities for Nigerians.

POLICY OBJECTIVES

The objectives of Rush Right Limited's Local Content Policy are as follows:

- To promote the development of local capacity in the oil and gas industry and other sectors of the Nigerian economy.
- To promote the use of Nigerian goods and services in our operations and activities.
- To create employment opportunities for Nigerians.
- To comply with the Nigerian Oil and Gas Industry Content Development Act (NOGICD Act) of 2010 and other relevant local content laws and regulations.

LOCAL
